

## **Fountain Avenue Neighborhood Public Meeting #3**

November 17, 2005

6:00 PM

Fountain Avenue Methodist Church

### Meeting Summary

After a brief progress update from the Planning Department, the City Engineering and Public Works Departments spoke about what their job responsibilities are. Key infrastructure issues were discussed about the current status of roads, sidewalks, alleys, drainage, garbage pickup, community cleanup, and storm/sanitary sewers. If you have infrastructure design issues call the Engineering Department (444-8511), if it is infrastructure maintenance issues call the Public Works Department (444-8682).

Next the Parks Department discussed options and ideas for improvements to Circle Park (Lang Park). The ideas included adding playground equipment, community gardens, flower gardens, reducing the road width and adding more greenspace, and slowing down the traffic. Overall, the general consensus was to leave the park as open greenspace without any new equipment, but add beautifying landscaping with flowers.
